

Forum “See the Arboretum: visualization and nature-based solutions”

Format of the forum is seminar

This is a seminar aimed at presenting the idea of arboretum visualization and discussing the possibilities of applying nature-based solutions in the university environment.

The activity will mainly take the form of a **seminar with presentations and discussion** within the framework of the exhibition programme. It will include short presentations by university professors and a presentation of the EU-GREW project.

Agenda / structure of the session

The session will take place during the forum organised at Vytautas Magnus University as part of the 30-year anniversary of the International Agriculture Achievements Exhibition. The approximate structure is:

Preliminary programme

Opening of the forum

Introduction; nature-based solutions, Living laboratory and ENAbLS

Arboretum visualization for education

Presentation of the EU Grew project

Discussion with participants and exchange of ideas

Questions and closing remarks

Interaction component

The session will include **interaction with participants**, particularly through a discussion period and questions after the presentations. Participants will be encouraged to share their ideas and perspectives related to sustainability, green development, and cooperation between research and projects.
